Oil pushed higher as traders braced for a protracted conflict in the Middle East that could further roil energy markets. Global benchmark Brent rose 4.2% to settle above \$112 a barrel after erasing an earlier drop, while West Texas Intermediate settled above \$99. US President Donald Trump pushed back a deadline for striking Iranian energy infrastructure by 10 days and Secretary of State, Marco Rubio told CNN that the US has not received Iran's response to Washington's 15-point plan for talks to end the war. Brent crude is on pace for a record monthly gain in March. With Tehran forcing the near-complete closure of the Strait of Hormuz, restricting flows of energy vital to the global economy. Even as discussions about efforts to secure a ceasefire continued on Friday, the US and Israel bombed Iranian nuclear and steel facilities, while Iran retaliated across the Persian Gulf. Oil-market liquidity has thinned in recent sessions as traders fatigued by the breakneck newsflow move to the sidelines, amplifying price swings. Potential for near-term escalation during the weekend also prompted accelerated buying just ahead of market settlement.

Brent has surged by about 53% so far in March, and petroleum-product costs from diesel to jet fuel have rallied even more, burdening businesses and consumers. The increases have triggered concern about a simultaneous spike in global inflation and slowdown in growth. The spread between Brent and WTI widened on Friday to roughly \$13 a barrel, compared to \$5 less than a month ago. US benchmark gains have been muted amid ample regional inventories and an imminent strategic reserves release, boosting demand for the relatively cheap crude among foreign buyers cut off from their usual Persian Gulf supplies.

Oil Prices

- WTI for May delivery added 5.2% to settle at \$99.64 a barrel in New York.
- Brent for May settlement gained 4.2% to settle at \$112.57 a barrel. [Rigzone](#).

Focussed stocks

88 Energy (88E.L, 1.48p, £17m) 2025 Results. Cash at the end of the period was A\$6.8m (2024: A\$7.2m). During the year, 88 Energy enhanced and evolved its Alaskan portfolio. At South Prudhoe, the Company reported a maiden internal prospective resource estimate for the Canning Prospect, which was updated post period to cover the Ivishak, Kuparuk and also revised Canning and USB reservoirs. The expanded South Prudhoe acreage position includes fourteen new leases covering 34,560 acres. At Project Phoenix, 88 Energy achieved a significant milestone with the execution of binding terms for a farm-out participation arrangement with Burgundy Xploration. Under the agreed structure, Burgundy is to fund up to US\$39m of future gross work programme, providing a full carry through the planned horizontal wells and extended production test. [88 Energy](#).

88 Energy has successfully completed a bookbuild at an issue price of A\$0.029 per share, raising A\$5.0m before costs. The placement was heavily oversubscribed, reflecting strong support for the Company's sharpened Alaska-focused exploration strategy, expanded North Slope acreage position and the potential of the Company's forward programme of activities. The funds raised will strengthen the Company's balance sheet and accelerate key pre-drilling activities, including permitting and well planning for the Augusta-1 exploration well, currently scheduled to spud in 1Q27. Subject to shareholder approval the Company will also issue warrants and options on a 1-for-2 basis, exercisable at A\$0.0435 per share and £0.02262, respectively. [88 Energy](#).

Chariot (CHAR.L, 1.21p, £35m) further to the Company's previous announcement, a subsidiary of Etu Energias has signed a sale and purchase agreement to acquire a 20% working interest in Block 14 and a 10% working interest in Block 14K, offshore Angola. Chariot has part financed the acquisition through providing deposit funds of US\$12m and additional financing related transaction costs and in doing so has secured exposure to the economics associated with material oil production following completion of the acquisition. Shell Western Supply and Trading has provided an acquisition financing package in return for future offtake barrels. These facilities will be used to finance the final consideration payable on completion, which will be reduced by interim period adjustments. This funding combination ensures that the acquisition is fully financed, and the Chariot funds will be repayable from future cash flows from the asset, after servicing the Shell facilities. Chariot will be economically exposed to long-term future cash flows equivalent to current production of circa 4,000bopd and an equivalent indicative asset value of net NPV10 in excess of US\$100m at a US\$60/bbl oil price. Completion is expected in 2H26. [Chariot](#).

Parkmead Group (PMG.L, 21.5p, £23m) Interim Results. Revenue for 1H26 was £1.5m (1H25: £2.1m), reflecting a natural decline in net gas production to 143boepd (1H25: 181boepd) and a reduction in TTF natural gas prices (1H26: €32.1/MWh vs 1H25: €38.2/MWh). Post period end, the TTF benchmark has risen by >50% following the military conflict in the Middle East. Uptime at Kempstone Hill was 91% (1H25: 98%), with the reduction coming as a result of maintenance required at Turbine 3. Cost of sales increased to £1.8m (1H25: £0.9m) due to higher non-cash depletion changes for the Netherlands. Cash flow from operations saw an outflow of £1m (1H25: £2.3m outflow) and net loss for the period was £0.9m (1H25: £1.2m). Cash at the end of 2025 was £8.9m, with a further £4.0m held in term deposits. Following receipt of the second deferred payment from the sale of Parkmead E&P Ltd in March, total cash and term deposits equated to £16.1m. [Parkmead Group](#).

Seascope Energy Asia (SEA.L, 77p, £49m) has successfully raised £5.0m through a placing, retail offer and subscription at 70 pence per share, representing a 11.4% discount to the previous day's closing price. Certain directors have subscribed for £315,000 worth of shares. This fundraising is intended to support Seascope Energy's next phase of growth, including securing new acreage, bringing in strategic partners for its Temaris asset, making final investment decisions on DEWA and Temaris projects, and drilling the Kertang gas prospect. [Seascope Energy](#).

Pharos Energy (PHAR.L, 28p, £117m) 2025 Results. Group working interest 2025 production totalled 5,398boepd, in-line with guidance, of which 4,095boepd was in Vietnam and 1,303bopd was in Egypt. Group revenue for 2025 was US\$115m (Vietnam: US\$100m, Egypt: US\$15m). Cash at the end of the period was US\$40m. Year-end cash was enhanced by a US\$20m receivables payment from EGPC, taking total payments to US\$37.7m in 2025, and a YE25 receivables balance of US\$7.4m. Group cash capex for 2025 was US\$28m. Group working interest production guidance for 2026 is expected to be 5,200-6,400boepd (Vietnam: 4,000-4,950boepd, Egypt: 1,200-1,450boepd). Group cash capex for 2026 is expected to be US\$50m, US\$31m of which is carried forward from 2025 to complete the Vietnam TGT and CNV drilling campaign and Blocks 125 & 126 long lead items. US\$19m is for a six well drilling campaign in Egypt and abandonment provisions in Vietnam. [Pharos Energy](#).

Capricorn Energy (CNE.L, 275.5p, £194m) FY25 Results. Revenue in 2025 was US\$134m on an average oil price of US\$68.4/bbl and gas price of US\$3.1/Mcf. Full production for 2025 was 20,024boepd (40% liquids), above the mid-point of guidance. Strong production performance was driven by new development wells drilled since July 2025, supplemented by the benefit seen from the waterflood programme in the BED field area. Net cash generated from Egypt oil and gas production was US\$81m, with overall net cash of US\$103m, comprising US\$133m cash and US\$30m debt. Production guidance in 2026 is 18,000-22,000boepd (43% liquids). Capex guidance for 2026 is US\$85-95m. During 2025, liquidity in Capricorn's Egypt business improved significantly with collections of US\$217m, leading to a year end trade receivables to US\$86m and allowing for early repayment of the Senior Debt Facility. In December 2025, the Egyptian Cabinet approved the merged concession agreement, representing the final step prior to parliamentary approval, with formal ratification expected in 1H26. Capricorn remains committed to leveraging the new terms to enhance production and reserves. [Capricorn Energy](#).

Falcon Oil & Gas (FOG.L, 17.75p, £197m) the acquisition of Falcon Oil & Gas by Tamboran Resources has been approved by the Supreme Court of British Columbia, subject to certain amendments to the Plan of Arrangement relating to the treatment of Falcon shareholders that are subject to sanctions. Falcon and Tamboran are considering the amendments to the Plan of Arrangement required by the Final Order and the impact of the amendments on the implementation of the Transaction. Tamboran and Falcon plan to extend the outside date under the Plan of Arrangement to provide additional time for the satisfaction of such conditions. [Falcon Oil & Gas](#).

EnQuest (ENQ.L, 19.46p, £364m) 2025 Results. Production in 2025 reached 42,945Boepd, an increase from 40,736Boepd in 2024, driven by the acquisition of Vietnam operations and strong performance in Malaysia. Revenue decreased to US\$1,118.3m from US\$1,180.7m in the prior year, primarily due to lower oil prices, while adjusted EBITDA fell to US\$503.8m from US\$673.9m. The company refinanced its Reserve Based Lending facility in 4Q25, increasing liquidity to US\$679m, and proposed a final dividend of approximately US\$20m, subject to shareholder approval. Net debt at the end of the period was US\$433.9m (2024: US\$385.8m), a net debt to 12-month adjusted EBITDA ratio of 0.9x (2024: 0.6x). The company also highlighted progress in its South East Asia diversification strategy, targeting 35Kboed net production from the region by 2030. Net Group production in 2026 is expected to average 41,000-45,000boepd. Production to end February has averaged 32,429boepd, with March production consistently exceeding 50,000boepd. EnQuest has hedged a total of 5.1mmbbls for the next 12 months with an average floor price of US\$71.3/bbl and a further 3.5mmbbls in the subsequent 12 month period with an average floor price of US\$64.4/bbl. [EnQuest](#).

Europa Oil & Gas (Holdings) (EOG.L, 1.3p, £17m) has received approval from the Irish Government to extend Phase 1 of the FEL 4/19 licence to January 31, 2028. This extension will allow the company to conduct further technical studies and secure a partner for the development of the Inishkea West gas prospect, which holds an estimated 1.5 trillion cubic feet of gas. The company views this prospect as a strategic asset that could provide a reliable, low-emission energy source for Ireland and reduce reliance on imported gas, given its proximity to existing infrastructure. [Europa Oil & Gas](#).

Serica Energy (SQZ.L, 274p, £1077m) has completed its acquisition of a 40% operated interest in the Greater Laggan Area and associated infrastructure from TotalEnergies, adding over 5,000 boepd of net production and significant growth opportunities including the Glendronach tie-back and exploration licenses. The company settled the consideration for £1 and received a payment of \$55.7m, reflecting interim post-tax cash flows. The Greater Laggan Area is estimated to hold net 2P reserves of 4.0 mmboe and 2C resources of 5.4 mmboe as of December 31, 2025. [Serica Energy](#). Annual Results. Revenue in 2025 decreased to US\$601m (2024: US\$727m), primarily due to lower production, averaging 27,600boepd, impacted by unscheduled downtime at the Triton FPSO. Production YTD has averaged 38,600boepd, following a production interruption for further maintenance work at the Triton FPSO. Production has averaged over 50,000boepd since resumption from Triton, with potential 2026 exit rates of 65,000boepd. During the period, Serica completed four acquisitions at a combined value of US\$3.3/bbl of 2P reserves. 2P reserves at YE25 were 116.8mmboe (2024: 118mmboe), with pro-forma reserves following completion of acquisitions expected to be 138.5mmboe. Cash and restricted cash at YE25 were US\$31m, with total liquidity of US\$290m. A final dividend of 10p/share has been declared. Guidance for 2026 is unchanged with average production of >40,000boepd in 2026, capex of US\$175-195m and opex of US\$380-400m. [Serica Energy](#).

PetroTal Corp (PTAL.L, 28.7p, £264m) reported its 4Q and full-year 2025 results, with average production of 15,258bopd in 4Q and 19,473bopd for the full year, a 9% increase from 2024. The company generated US\$18.5m in Adjusted EBITDA for 4Q and US\$166.3m for the full year, alongside US\$90.4m in annual free funds flow, up from US\$74.1m in 2024. PetroTal returned US\$44m to shareholders through dividends and share repurchases in 2025, ending the year with US\$139.1m in total cash. The company also announced the approval of a tender award to resume development drilling at Bretana by October 2026 and the termination of its erosion control project contract due to delays and has initiated a procurement process to

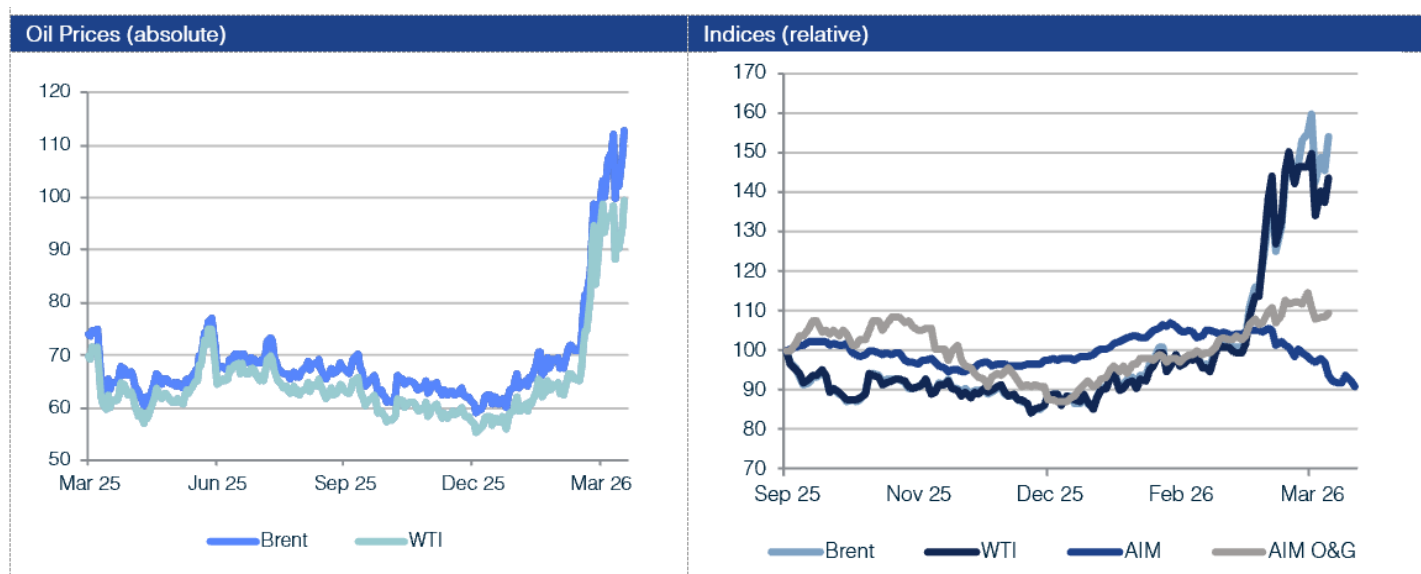

secure new contractors. YTD production has averaged 15,000bopd, with the Bretana field remaining constrained by water reinjection capacity. [PetroTal](#).

Zephyr Energy (ZPHR.L, 3.4p, £71m) reported a significant increase in non-operated hydrocarbon production, with 4Q25 output 55% higher than 2Q25, reaching 983 boepd. The company also completed non-core acreage divestments, generating US\$1.3m from Colorado and US\$802k from Wyoming, which enhances the economics of its US\$7.3m acquisition and supports its Paradox project. Approximately 25% of forecast March 2026 and 33% of the next twelve months' non-operated oil production is hedged, with the remainder exposed to favourable commodity prices. Progress continues on the Paradox project, with Enbridge conducting pipeline inspections and Zephyr evaluating marketing and joint venture partners. [Zephyr Energy](#).

Prospex Energy (PXEN.L, 3.6p, £16m) has been formally offered two onshore Polish licences, San and Dunajec, which its subsidiary PXEN Tatra has accepted, with the regulator expected to award them in April/May 2026. These licences, located in southern Poland within a proven gas play, offer the opportunity for Prospex to identify additional energy resources and potentially accelerate first production from an undeveloped oil discovery in the Dunajec area. A fee of approximately €289,000 is payable upon award, to be funded from existing cash reserves. Prospex intends to introduce joint venture partners to fund work programmes and advance activities on these prospective licences. [Prospex Energy](#).

Helix Exploration (HEX.L, 39.25p, £77m) has released its audited Annual Report for the year ended 30 September 2025, detailing a year of significant transformation with the commencement of production at its Rudyard Project post-period end, exceeding expectations with strong flow rates and helium concentrations up to 1.2%. The company successfully completed a £4.5m institutional fundraise in June 2025 and a further £2.2m in March 2026 to support operations and working capital. Financially, the company reported intangible assets of £9.8m and property, plant, and equipment of £3.7m as of 30 September 2025, with total assets increasing to £16.8m from £9.2m in the prior year, while the net loss for the year was £1.9m. Cash at the end of the period was £2.7m (2024: £5.0m). [Helix Exploration](#).

Helium One Global (HE1.L, 0.64p, £60m) has announced a significant update on its Galactica Project, with the operator reporting that six wells are now tied into the Pinon Canyon facility, completing Stage One of the development campaign. The facility is transitioning to continuous 24/7 operations following automation and system upgrades, and initial helium sales have been agreed at spot pricing for the first tube trailer, with a second expected shortly. The company is leveraging strong market tailwinds from global supply disruptions to advance discussions for long-term helium and CO₂ offtake, with CO₂ liquefaction on track for the first half of 2026, coinciding with the tie-in of the Jackson-27 well. [Helium One](#). Annual results. Cash at the end of the period was US\$5.1m (2024: US\$10.0m). The company was awarded a 480km² Mining Licence for the southern Rukwa Helium Project in Tanzania and commenced Electrical Submersible Pump operations at ITW-1. In the USA, the Galactica Project achieved its first gas in December 2025, with six wells now tied into the Pinon Canyon facility, which is transitioning to 24/7 operations. Helium One raised approximately £8.1m in net proceeds through an Investment Agreement and WRAP Retail Offer. Post-period, ESP testing at ITW-1 produced over 250,000 barrels of water with sustained helium concentrations of 5.4%, [Helium One](#). Helium One has also announced a £5.0m fundraise at 0.6p per share (a 17.6% discount). The proceeds will be used to advance the Galactica Project in Colorado, maintain the southern Rukwa Helium Project in Tanzania while pursuing a farmout strategy, and for general working capital. [Helium One](#).

Investment risk

Investing in shares presents risks and opportunities. The past is not necessarily a guide to the future performance of an investment. The value of investments and the income derived from them may fall as well as rise and investors may not get back the amount invested. Some investments discussed in this publication may have a high level of volatility. High volatility investments may experience sudden and large falls in their value which may cause losses. The information on future performance in this communication is an illustration and is not a reliable guide to actual future performance.

Non-UK stocks

International investing includes risks related to political and economic uncertainties of foreign countries, as well as currency risk.

Emerging markets

Investors should be aware of the additional and special risks associated with securities and investments in emerging markets. Consequently, it may be difficult to sell or realise such investments.

The content of this promotion has not been approved by an authorised person within the meaning of the Financial Services and Markets Act 2000. Reliance on this promotion for the purpose of engaging in any investment activity may expose an individual to a significant risk of losing all of the property or other assets invested.

This financial promotion is made by Cavendish Capital Markets Ltd, authorised and regulated by the Financial Conduct Authority (FRN: 467766). Registered office 1 Bartholomew Close, London, EC1A 7BL (company no: 06198898).

Disclosures

Analyst certification

The Sales Person(s) / Research Analyst(s) responsible for preparing this investment recommendation/report or sections of this report, in whole or in part, hereby certify/ies that, with respect to any and all of the securities or issuers that the Sales Person(s) / Research Analyst(s) cover(s) in this report, the views expressed in this report accurately reflect his/her/their personal views. However, this investment recommendation / report may have been disclosed to the issuer prior to its publication and may have been subject to amendment thereafter. The proprietary models used in production of this investment recommendation are available on request. It is intended that the proprietary models used in this investment recommendation shall be updated when appropriate. In addition, no part of the Sales Person(s) / Research Analyst(s)' compensation was, is, or will be directly or indirectly, related to the specific recommendations or view expressed in this report or summary.

Recommendations definitions

Definition of research recommendations

Disclaimer

This communication is NON-INDEPENDENT RESEARCH AND A MARKETING COMMUNICATION under the FCA's Conduct of Business Sourcebook (COBS) containing investment recommendation(s) and is issued in the UK by Cavendish, the trading name for the business operated by Cavendish Capital Markets Limited, Cavendish Securities plc and Cavendish Corporate Finance LLP, which are authorised and regulated by the Financial Conduct Authority (FCA) and are members of the London Stock Exchange. Non-independent research has not been prepared in accordance with the legal requirements to promote independence of investment research and is not subject to any prohibition on dealing ahead of the dissemination of investment research. Cavendish considers that this communication.

This document and any investment to which this document relates is intended for the sole use of the persons to whom it is addressed and is for distribution in the United Kingdom only to 'professional clients' or 'eligible counterparties' within the meaning of chapter 3 of COBS or persons described in Articles 19(5) (Investment professionals) or 49(2) (High net worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended) ('FPO') and all other exempt persons under the FPO (all such persons together being referred to as 'Relevant Persons'). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons and may not be relied upon by such persons and is therefore not intended for private individuals or those who would be classified as retail clients under COBS. This document is directed only at Relevant Persons. Other persons should not act or rely on this document or any of its contents. Laws and regulations of other countries may also restrict the distribution of this report. Persons in possession of this document should inform themselves about possible legal restrictions and observe them accordingly. Any investment to which this document relates is available only to such persons, and other classes of person should not rely on this document.

This document has been prepared and issued by Cavendish on the basis of publicly available information, internally developed data and other sources believed to be reliable. Share price performance graphs are sourced from Morningstar, FactSet, Proquote International and Thomson Reuters Datastream. The information contained in this publication was obtained from various sources believed to be reliable, but has not been independently verified by Cavendish. Cavendish does not warrant the completeness or accuracy of such information and does not accept any liability with respect to the accuracy or completeness of such information, except to the extent required by applicable law. Any opinions, projections, forecasts or estimates in this report are those of the author only, who has acted with a high degree of expertise. They reflect only the current views of the author at the date of this report and are subject to change without notice. Cavendish has no obligation to update, modify or amend this publication or to otherwise notify a reader or recipient of this publication in the event that any matter, opinion, projection, forecast or estimate contained herein, changes or subsequently becomes inaccurate, or if research on the subject company is withdrawn. The analysis, opinions, projections, forecasts and estimates expressed in this report were in no way affected or influenced by the issuer. The author of this publication benefits financially from the overall success of Cavendish.

This publication is a brief summary and does not purport to contain all available information on the subjects covered. Further information may be available on request. This report may not be reproduced for further publication without the prior written permission of Cavendish. This publication is for information purposes only and shall not be construed as an offer or solicitation for the subscription or purchase or sale of any securities, or as an invitation, inducement or intermediation for the sale, subscription or purchase of any securities, or for engaging in any other transaction. The investments referred to in this publication may not be suitable for all recipients. Recipients are urged to base their investment decisions upon their own appropriate investigations that they deem necessary. Any loss or other consequence arising from the use of the material contained in this publication shall be the sole and exclusive responsibility of the investor and Cavendish accepts no liability for any such loss or consequence. In the event of any doubt about any investment, recipients should contact their own investment, legal and/or tax advisers to seek advice regarding the appropriateness of investing. Some of the investments mentioned in this publication may not be readily liquid investments. Certain transactions, including those involving futures, options, and high yield securities, give rise to substantial risk and are not suitable for all investors. Investors should be aware of the additional and special risks associated with securities and investments in emerging markets. Consequently, it may be difficult to sell or realise such investments. The past is not necessarily a guide to future performance of an investment. The value of investments and the income derived from them may fall as well as rise and investors may not get back the amount invested. Some investments discussed in this publication may have a high level of volatility. High volatility investments may experience sudden and large falls in their value which may cause losses. International investing includes risks related to political and economic uncertainties of foreign countries, as well as currency risk. To the extent permitted by applicable law, neither Cavendish, nor any of its directors, officers or employees, accepts and liability whatsoever for any loss, damages, costs or prejudices whatsoever arising from the use of this publication or its contents.

Cavendish has written procedures designed to identify and manage potential conflicts of interest that arise in connection with its research business and its production. Cavendish's research analysts and other staff involved in issuing and disseminating research reports operate independently of Cavendish's Corporate Finance business. Information barriers procedures are in place between the Sales and Research Analysts and staff involved in securities trading for the account of Cavendish or its clients to ensure that inside information is handled according to applicable laws and regulations.

Cavendish may be remunerated by a company for writing research on that company, in which case, a specific disclosure will be made in the relevant research report. Each company understands and agrees that the analysis, opinions, projections, forecasts and estimates expressed in such research reports will be honest and unbiased in compliance with Cavendish's Conflicts of Interests and Research Policies and will in no way be influenced by any remuneration received by Cavendish from the company. For further details, please see Cavendish's Conflicts of Interest Policy available on our website at www.cavendish.com.

Cavendish Capital Markets Limited, Cavendish Securities plc and Cavendish Corporate Finance LLP are incorporated and principally operate in England and Wales. Cavendish is not registered as a broker-dealer in the US and relies on the exemption in Rule 15a-6 under the Securities Exchange Act of 1934 when interacting with US persons. For the purposes of this exemption, please note that this publication should not be construed as an invitation, inducement, solicitation or intermediation for the sale, subscription or purchase of any securities or for engaging in any other transaction. Cavendish Capital Markets Limited and its assets are regulated in England and Wales by the FCA (registered number 467766), Cavendish Securities plc and its assets are regulated in England and Wales by the FCA (registered number 416932) and Cavendish Corporate Finance LLP and its assets are regulated in England and Wales by the FCA (registered number 474794). Accordingly, laws, regulations and remedies may differ to those available in the US.

Cavendish is not registered in any Canadian jurisdiction but operates in Canada using the International Dealer and/or Adviser exemption granted by the Ontario Securities Commission under section 8.18 and/or 8.26 of NI31-103. Laws, regulations and remedies may differ to those available in Canada accordingly.

This document may be distributed to wholesale clients in Australia in reliance on relief pursuant to ASIC Class Order CO 03/1099.

For Entities and Clients in the United States

This research is not available to, and should not be used by, any U.S. person or entity that is not a "major U.S. institutional investor" as described in the next paragraph. Cavendish is not a member of the Financial Industry Regulatory Authority ("FINRA") and is not registered as a broker-dealer with the U.S. Securities and Exchange Commission ("SEC"). Accordingly, Cavendish and its analysts are not subject to certain SEC and FINRA regulations that might otherwise be applicable in the context of research distribution into the United States or to U.S. persons. While Cavendish has a chaperoning broker dealer relationship with Beech Hill Securities, Inc. ("BHS") in the U.S., pursuant to Rule 15a-6 of the Securities Exchange Act of 1934 ("Rule 15a-6"), this research report is offered directly by Cavendish solely to major U.S. institutional investors pursuant to Rule 15a-6(a)(2) without any intermediation or other involvement of BHS in connection with the distribution of the report, including but not limited to review, approval or retention of the research reports so distributed or the maintenance of records relating thereto. Notwithstanding this direct distribution, Cavendish cannot and will not accept orders for securities covered in this research report placed by any person or entity in the United States and all such orders must be placed and effected through BHS, which can be contacted via 212-350-7232 or Trading@BH-Secs.com.

"Major U.S. institutional investors" that may receive and use this report include (i) U.S. institutional investors (described in the next sentence) that have, or have under management, total assets in excess of US\$100 million; provided, however, that for purposes of determining the total assets of an investment company, the investment company may include the assets of any family of investment companies of which it is a part; or (ii) investment advisers registered with the SEC under Section 203 of the Investment Advisers Act of 1940, as amended, that have total assets under management in excess of US\$100 million. "U.S. institutional investors" include (i) investment companies registered with the SEC under Section 8 of the Investment Company Act of 1940; or (ii) a bank, savings and loan association, insurance company, business development company, small business investment company, or employee benefit plan defined in Rule 501(a)(1) of Regulation D under the Securities Act of 1933 ("Reg D"), as amended; a private business development company defined in Rule 501(a)(2) of Reg D; an organization described in section 501(c)(3) of the Internal Revenue Code, as defined in Rule 501(a)(3) of Reg D; or a trust defined in Rule 501(a)(7) of Reg D.
